Image Max. Video Shopping Ads Standard Video	Image MaxVid Shop StandVid	Designed to show off a product or service Shopping ads feature one image at a time and allow people to purchase products they find on Pinterest. Standard width video ads are videos that are the same size as a normal Pin.
TikTok	Tiktok	Tiktok
Branded Effect	BranEffect	Branded Effects refer to the effects purchased by brands to be launched as an ad campaign at TikTok. Branded Effects allow brands to create highly-customizable effects with their own brand logos or other branding elements.
Collection Ad	Collection	Collection ads are a type of TikTok ads format that allows business dynamically showcase their products cards during the in-feed video ad. When you publish collection ads, your customers are led to an Instant Gallery Page and they can swipe your products collection or services without leaving TikTok app.
Display Cards	DispCard	Visually showcase brand messaging or offers via Display Card that transcends the standard card format. Gift Code Sticker. Contrary to the TikTok release, these arguably target the lower funnel as viewers can click for a code and copy it before heading to purchase.
Dynamic Showcase Ad	DSA	TikTok Dynamic Showcase Ads, or DSAs, are custom video ads created in real-time and built around an ad template. This ad template is filled with product info from a regularly updated product catalog.
Hashtag Challenge	TagChal	Share a video using a sponsored hashtag, then it's over to TikTok's creative community to respond by making and sharing videos of their own.
Instant Page	InstPage	Within an Instant Page, users can view videos and images, swipe through carousels, or click on buttons to explore another destination - all without leaving the TikTok app.
Interactive Cards Spark Ads	InteraCard SparkAds	Interactive Add-ons offer a way to entice engaged viewers with popups, stickers, and other visual elements. TikTok Spark Ads is a new native ad format that enables you to leverage organic TikTok posts and their features in your advertising.
SuperLike	SuperLike	This offers a way to make "liking" a video a more engaging experience. When users tap the like (heart) button on a TikTok video, the Super Like can display different types of icons that appear on viewers' screens.
Voting Cards	VotCard	Voting Cards have one important advantage over other formats because they offer user feedback. The format can be used to redirect users to two different landing pages. In this manner, companies can actively encourage users to engage with ads.

Keyword Match	Keyword Match Short	Definition: Parameters set on keywords that control which searches trigger your ads to appear
Broad Match	BM	Ads may show on searches that are related to your keyword, which can include searches that don't contain the keyword terms. This helps you attract more visitors to your website, spend less time building keyword lists, and focus your spending on keywords that work. Broad match is the default match type that all your keywords are assigned as if you don't specify another match type (exact match, phrase match or a negative match type). The syntax for broad match is to simply input the keyword.
Dynamic Search Ads	DSA	Dynamic search ads are search ads that show based on the content of your site. Google essentially crawls your site and then matches to search terms that are closely related to the content on your site. From that point, the headline and landing page are dynamically generated to match the search term.
Dynamic Search Ads + Broad	DSAB	A campaign containing dynamic search ads groups and broad match keyword groups
Dynamic Search Ads + Broad + Exact	DSABE	A campaign containing dynamic search ads groups, exact match keyword groups and broad match keyword groups
Dynamic Search Ads + Broad + Exact + Phrase	DSABPE	A campaign containing dynamic search ads groups, exact match keyword groups, phrase match keyword groups and broad match keyword groups
Dynamic Search Ads + Broad + Phrase	DSABP	A campaign containing dynamic search ads groups, phrase match keyword groups and broad match keyword groups
Dynamic Search Ads + Exact	DSAE	A campaign containing dynamic search ads groups and exact match keyword groups
Dynamic Search Ads + Phrase	DSAP	A campaign containing dynamic search ads groups and phrase match keyword groups
Dynamic Search Ads + Phrase + Exact	DSAPE	A campaign containing dynamic search ads groups, exact match keyword groups and phrase match keyword groups
Exact Match	EM	Ads may show on searches that are the same meaning or same intent as the keyword. Of the three keyword matching options, exact match gives you the most control over who sees your ad. Exact match is designated with brackets, such as [red shoe].
Exact Match + Broad	EMB	A campaign containing exact and broad match keywords
Exact Match + Broad + Phrase	EMBP	A campaign containing exact, phrase and broad match keywords
Exact Match + Phrase	EMP	A campaign containing exact and phrase match keywords
Phrase Match	PM	Ads may show on searches that include the meaning of your keyword. The meaning of the keyword can be implied, and user searches can be a more specific form of the meaning. Phrase match is more flexible than exact match, but is more targeted than the default broad match option. With phrase match, you can reach more customers, while still showing your ads to customers who are most likely searching for your product or service.
Phrase Match + Broad	PMB	This is an example of the feature in the new Modern search structure advised by GroupM and Google to take advantage of Google's ML capabilities and hence, optimise campaigns' performance. The new Modern search structure allows for campaigns to have multiple keyword match (1-1 or 1-multiple mapping). In case of 1-1 mapping, the keyword match on campaign level (UNCC mandatory input) is the same as the keyword match on ad group level (regional mandatory input). In case of multiple keyword match types on campaign level, the individual keyword match type (1-1 mapping only) is broken down on ad group level. In this case, "Phrase Match + Broad", the campaign has at least 2 ad groups with DISTINCT keyword match Phrase Match and Broad Match.

Keyword Type	Keyword Type Short	Definition: Keyword type is a cluster of keywords themes
Brand	Brand	Keywords that contain the brand in it without reference to a brands product e.g. Tresemmme
Brand Product	BrndProd	Keywords that contain the brand and product e.g. Tresemmme Keratin Smooth
Competitor	Comp	Keywords that contain the competitor in it e.g. head and shoulders.
Dynamic Search Ads	DSA	Dynamic search ads are search ads that show based on the content of your site. Google essentially crawls your site and then matches to search terms that are closely related to the content on your site. From that point, the headline and landing page are dynamically generated to match the search term.
Generic	Gen	Keywords that are usually about the category and that do not contain the brand or brand product or reference a product type in it. E.g. dandruff hair solution.
Generic Product	GenProd	Keywords that are usually about the category and that do not contain the brand or brand product in it. E.g. best shampoo
Brand Generic	BrndGen	Keywords that contain the brand name combined with a generic term e.g. Tresemmme shampoo

Landing Page Type	Landing Page Type Short	Definiton: Indicates type of destination page the user will be driven to
Brand	Brand	Going to a brand.com website such as Tresemmme.com. Based on the list provided by the local teams.
Category	Cat	Going to a category website such as allthingshair.com. Based on the list provided by the local teams.
Retail	Retail	Going to a retailer website such as Amazon. Based on the list provided by the local teams.
Social	Socl	Going to a social website such as facebook.com. Based on the list provided by the local teams.
